CAREER OBJECTIVE

B.Tech Computer Science student and Full-Stack Developer with hands-on experience designing and developing scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building RESTful APIs, secure authentication systems, database-driven applications, and responsive user interfaces. Seeking a Software Developer role to contribute technical skills, solve real-world problems, and grow as part of an innovative engineering team.

TECHNICAL SKILLS

Frontend — React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design, Vite

Backend / DB — Node.js, Express.js, MongoDB, Mongoose, REST API Design

Languages — JavaScript, C++

Tools — Git, GitHub, Docker, Kali Linux

Concepts — Component-Based Architecture, RBAC, JWT Auth, Data Structures & Algorithms

PROJECTS

Cineboxd

- Built a full-stack movie tracking platform enabling users to discover movies, manage favorites, watchlists, and watched history using TMDB API integration.
- Developed secure authentication and authorization system with JWT, bcrypt password hashing, protected routes, and role-based admin access.
- Designed and implemented REST APIs with Node.js, Express, and MongoDB to manage users, movie interactions, and persistent user activity data.
- Optimized frontend data fetching and user experience using React Query caching, Axios interceptors, and deployed the React SPA globally through Cloudflare Workers.

FormEZ

- Built a full-stack government document assistance platform that helps users explore requirements, fees, timelines, FAQs, and step-by-step application procedures.
- Developed a dynamic admin dashboard with secure JWT authentication, enabling administrators to create, update, activate/deactivate, and manage document guides.
- Designed scalable MongoDB schemas and REST APIs using Node.js and Express to handle document categories, application steps, requirements, and external resources.
- Implemented responsive React interfaces with reusable components, protected routes, Axios API integration, and light/dark theme management for improved user experience.

CodeSync

- Developing a MERN-based collaborative coding platform with real-time workspace management, file handling, and multi-user code synchronization.
- Implementing WebSocket-driven collaboration features to enable seamless live editing experiences similar to modern cloud IDE platforms.

EDUCATION

B.Tech in Computer Science & Engineering, Parul University

2023 – 2027 | Vadodara, Gujarat, India

Intermediate, Telangana Board of Intermediate Education

2022 | Telangana, India

ADDITIONALS

Docker  (issued by Udemy)
